

enable remote communications with a telephone network, said remote control unit communicating with said first device; and said first device including a storage storing instructions that enable the processor to prompt the user to issue a page on the user's wireless telephone.

**REMARKS**

In the previous office actions, it was indicated that claim 22 is in condition for allowance. Therefore, claim 20 has been amended to include the subject matter of claim 22. This amendment should be permitted since it merely complies with the examiner's requirements.

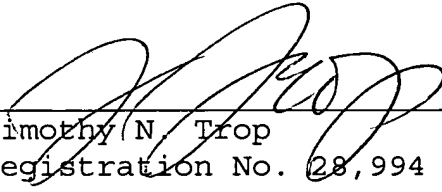

Similarly, the other claims have been amended to include subject matter corresponding to claim 22. Since this subject matter was already indicated to be allowable, those amendments likewise should raise no new issues. Added claim 26 corresponds to the previously added material deleted from claim 16.

Therefore, the present amendment should be entered in the application you to issue.

Respectfully submitted,

Date: \_\_\_\_\_
